Acerca de la lista de permisos de confianza parcial de seguridad

La autoridad de certificación CNNIC emitió incorrectamente un certificado intermedio. Para solucionar este problema, se agregó un mecanismo para confiar parcialmente en una autoridad de certificación mediante la confianza en solo un conjunto de certificados.

En OS X, se puede revocar la confianza desde cualquier certificado de raíz de CNNIC o desde cualquier certificado en la lista de elementos permitidos con los pasos siguientes:

- Busca el certificado en el que no deseas confiar nunca. Por ejemplo, haz clic en el ícono del candado en Safari y arrastra el ícono del certificado a una ubicación en el escritorio.
- Haz doble clic en el certificado para abrirlo en Acceso a llaveros. En un certificado terminal, deberás hacer doble clic en el certificado para abrirlo. En el caso de los certificados de raíz, se te llevará a Acceso a llaveros durante la importación.
- Cambia la configuración de confianza a No confiar nunca.

Para encontrar la versión de la tienda Trust Store instalada en tu dispositivo iOS, presiona Configuración > General > Información. Desplázate hasta el final de la lista para ver la versión de la tienda Trust Store.

Para ver una lista completa de los certificados de confianza, consulta Tienda Trust Store de OS X y Tienda Trust Store de iOS.

Contenidos de los certificados de CNNIC en los que confían iOS y OS X

Certificados emitidos por "China Internet Network Information Center EV Certificates Root" en el conjunto de confianza
